Determining of the final classification

At the end of the Trial, all penalties incurred in the various legs will be added together. The crews' worst result of one of the regularities (*except those of the night legs*) will be deleted. In case of a tie, the best result recorded at the last regularity of the last leg will be decisive, this going back as far as necessary. The provisional final classifications will be published on the Result Board and are open for query for a period of 30 minutes, after which they will be declared final.

The crew with the lowest overall total penalties, in category Trial and Challenge (*except those cars of class 13 to 15, see article 6 and 16*) will be declared as winners of the 20th WINTER TRIAL (in their category). Team results will be based on the results (position in their category) of the three best team members.

All queries must be made in writing only at the daily results sheet and handed in before the closing time of the finish control (MTC-IN) of the next leg, at the latest. Replies will be available for collection at the Rally Headquarters administration desk (MTC-OUT).

In case a competitor cannot implement the original route instructions of the organiser, this cannot be a subject of query if the organiser can prove that the cause is not a result of an organiser's failure. The accuracy of the distances and the time schedule calculated by the organisers are not open to query.

In case a passage control is not present at the moment of the crews' passage, this can not be a reason to cancel that control if the organiser can prove that the cause is not a result of an organisers' failure.

They close 30 minutes after the scheduled time of the last car, except the last time control (MTC-IN) of the leg (see article 23) unless the Clerk of the Course decides otherwise. All Controls must be visited using the direction of approach and departure implied in the Road Book, marked map or other official instructions.

The organiser may establish unmanned passage controls (for example by the Rally Safe track & trace system) at any point on the route. A Passage Control can be combined with a Speed Check by the Rally Safe track & trace system.

The marshal shall enter the time on the control card as soon as it is handed in. Crews do not incur any penalty for checking in if they hand in the control card during their scheduled check-in minute. Any difference between the actual check-in time and the scheduled check-in time will be penalised.

24 REGULARITY TEST SECTION

General

The start location of regularity will be given in the road book or by the route instructions. The crews must complete the regularity at one or more average speed(s) fixed by the organiser.

Regularity Start Manned (RSM)

Some regularity will have a manned start. At a manned start, the marshal will enter the start time at the crews' time card and he/she gives the crew the start signal "GO", after countdown of the final 5 seconds. In the event of a delay at a manned start regularity, the crew may ask for an arrival time. If the difference between the arrival time and the start time is more than 3 minutes, this will be considered as a delay and crews may carry this delay forward up to the next regrouping, where it must be absorbed, or finish of the leg.

Regularity Self Start (RSS)

Most regularities will use the self start system where it is the crews' responsibility to start at the correct time and in the correct direction. The start time is given as a number of minutes from the control post (TC or PC) immediately preceding the regularity. If this control is a passage control then the time entered on the time card has no significance other than to allow the crew to calculate their start time at the subsequent self start regularity.

Regularity Start Logger (RSL)

A regularity start logger is much like a regularity self start. On a regularity start logger, the competitor can leave the start location at his own time, but only on the whole minute so that no two cars can start at the same minute. The actual start time will be taken by the Rally Safe track & trace system (logger) at the moment the car leaves the start line of the regularity. The start time will be down graded to the whole minute.

Timing Procedure

A start of a regularity is also a passage control. A regularity may have one or more **Timing Points (TP)**. Timing will be done by hand or by the Rally safe track & trace system (logger). An intermediate manned timing point will be indicated by a yellow control sign where the car must stop for recording the passing time. However, once the crew sees a manned timing point they must not stop, slow down or overtake another moving car in sight of the control post under pain of a penalty.

The last timing point will be indicated by a red control sign where the car must stop for recording the time. If the last timing point is unmanned (Rally Safe track&trace), then the car must not stop. Timing will be done between the regularity start (RS) and each of the timing points. The organiser will set for each timing point a target time (ideal time), each second below or over the target time will be penalised. *For example:*

if there are 3 timing points, A, B and C, then the times will be measured from RS to A, from RS to B and from RS to C.

The penalty per second early or late can be different per leg. If these penalties will change, this will be published in a Route Bulletin before the start of the leg concerned. The penalty for not running a regularity depends on the number of missed timing points; however the maximum penalty per regularity will be 30 minutes plus 15 minutes for missing the start of the regularity.

Time penalties

- Not starting on the whole minute/starting within the same minute as a previous car (RSL) 5 minutes
- starting before start signal (RSM) 20 seconds
- each second early or late on a timing point (if not changed) 1 second
- missing regularity start 15 minutes
- missing timing point 5 minutes
- maximum penalty per timing point, if visited 3 minutes
- maximum penalty for missed timing points, per regularity section 30 minutes
- regularity not driven (maximum) 45 minutes

25 CLOSED CIRCUIT REGULARITY TEST (LAP CONSISTENCY TEST)

Each crew must set his individual target time by his first timed lap. This target time should be within the limits as given in the hand out. Subsequent laps must be completed in an identical time. For each second below or over the individual target time on each lap, a penalty will be applied. The maximum penalty of the test for not following the entirety of the test instructions is 10 minutes. The maximum penalty for not participating the test is 10 minutes plus 15 minutes for missing the start of the test.

Penalties

- Target time not within the limits 3 minutes
- each second below or over individual target time, per second 1 to 10 seconds
- too few laps, per lap difference on target time, plus 3 minutes
- too many laps difference on target time, plus 3 minutes
- maximum penalty 10 minutes
- not started the test 25 minutes

26 DRIVING TEST

Each test has a manned start. The marshal at the start shall enter the start time at the card and he/she gives the start signal "GO" after countdown of the final seconds.

A driving test may have one or more manned intermediate stops astride. Failing to stop, overshooting or reversing will be penalised. Touching a cone or course maker will be penalised.

Cars must stop astride at the finish of the test and must then immediately move forward, to have their time registered. If the car overshoots the finish line, it must not reverse. If a car reverses back to the finish line or fails to attempt to stop astride, a penalty of 3 minutes will be added to the driven time.

The penalisation for not following the entirety prescribed route is 10 minutes. The maximum penalty for crews who do not take part in the test is 10 minutes, plus 15 minutes for missing the start.

Target time (Bogey time)

For each Class a Bogey time will be set by the fastest crew (without any additional penalties). For all other crews the time penalty will be the time taken minus the Bogey time.

Time penalties

- Time taken minus the bogey time, each second 1 second
- starting before start signal 20 seconds
- failing to stop astride (overshooting) 10 seconds
- failing to attempt to stop astride 3 minutes
- touching a cone or route marker 10 seconds
- reversing in case of overshooting finish line 3 minutes

27 NAVIGATION SECTION

A navigation section will have a manned passage control as start or a start at the previous time control. A navigation section will have a number of Route Checks (RC), which have to be visited as instructed and in the correct order. At these Route Checks, code boards will be placed at the right side of the road. The Rally Safe Track&Trace system will register the passage and the order of the passage. Only the first passage will be registered to decide the order of passage.
